### 10) impression

I especially liked the small group size.

Very helpful, could 've been a bit more "hands on" and less talking of the instructor.

Nice atmosphere.

Interesting. The trainer created a good atmosphere.

It was quite funny, but you can also take something with you.

Easily understandable, good atmosphere, helpful suggestions.

Very helpful.

### 12) which parts did you like/ didn't you like

Practise talks, feedback on mistakes. The first day was in most parts lengthy and a bit boring e.g. the endless discussion about analogies.

Did not like: too much in two days --> maybe three days?

It was very good that you should make presentations on your own, but it might be helpful to improve and repeat this another time; sometimes sofa would be more comfortable.

Good: presentations by participants, videos, use of media; suggestions: more feedback for the presenter, deeper analysis of the videos

Liked all of it, maybe a bit more active role of the participants.

### 13) which topics were disregarded

Not disregarded, but should 've been more in detail: slide design

Specific points about math presentations.

No one.

### 14) which other parts should have been part of the workshop

Perhaps more weight on decision what to talk about.

Working on body language.

More on how to behave while speaking

How to make such power point slides that the audience is fascinated.

### 15) was it worthwhile to participate?

Yes, I got new ideas/things to think about in my next talks/exercises

Yes, especially to see my own mistakes and those of others while practising.

Yes, I learned some methods, got some ideas what to consider when giving a presentation.

Yes, I got an idea on how to give better presentations and there were practical exercises.

Yes, because I have learned things I can use in presentations.

Good overview of things that are important for a presentation.

Yes, it was instructive and stimulating.

#### **16) What in your opinion should be change to improve the workshop?**

Maybe more small talks. Maybe filming the persons so they can watch themselves.

More time, not so packed.

The chairs and the time (not 9 o'clock on the weekend).

Maybe one could do the presentation at the end of the first day, discuss how to improve it and then do it again the next day. Or a second talk or each participant in order to practice more!

More discussion among the participants.

#### **17) Further comments**

Very good and helpful.
